

Comparison between HikCentral VS iVMS-4200

- System architecture & Capacity
- **2** Google Map
- **3** Access Control & ANPR
- 4 Maintainability

# 1.1 System architecture

System architecture: HikCentral can achieve multi-users management.

### 1.2 Capacity

Capacity: HikCentral can support large-scale project.

HikCentral supports up to 1024 encoding devices, up to 3000 channels. It also support ONVIF access.

iVMS-4200 supports up to 256 encoding devices, up to 1024 channels. It can't support ONVIF access.

## 2 Google Map

Google Map: HikCentral can support Google Map.

HikCentral supports both Google map and E-map to locate sites and cammeras.

iVMS-4200 only supports E-map.

#### 3.1 Access Control

Access Control: HikCentral integrates more functions than 4200.

HikCentral integrates Active Directory.

iVMS-4200 don't support Active Directory.

### **3.2 ANPR**

ANPR: ANPR of HikCentral is dedicated for entrance/exit management.

HikCentral can provide License plate recognition, History vehicle information search, Real-time vehicle alarm for entrance/exit management.

License plate recognition

iVMS-4200 can't provide entrance/exit management.
